

20 Element Mini-Log Periodic Group K Aerial

BLA-LP20K | 20 Element Log-Periodic Group K Aerial with Twistable F

20 Element Log-Periodic Group K Aerial With "Twistable F" to ensure the F-Connector always points downwards to ensure weatherproof connections. The 20 Element Log-Periodic Group K Aerial is built for superior signal reception in strong signal areas.

Technical specification

UHF, DAB or FM	UHF
Saddle and Clamp/F-Type/SMA	F-Type
Aerial Group	K
Good, Moderate or Poor Signal Aer...	Good- Signal Areas
Boxed or Bagged	Bagged
Width	310mm
Depth	50mm
Height	435mm
Weight	0.45kg

UHF	F-TYPE	K	BAGGED
UHF, DAB or FM	Saddle and Clamp/F-Type/SMA	Aerial Group	Boxed or Bagged

Key features

- For strong signal areas.
- Can be mounted for horizontal or vertical polarisation.
- Solid build quality, stronger elements and a rugged construction.
- Excellent log periodic impulse noise rejection.
- Overcomes issues with 5G & 4G, specially developed to reduce bandwidth without using filters.
- Molded F connector in weather resistant rubber housing.The F connector can be simply twisted into the required position (Vertical or Horizontal) with
- Very flat frequency response over channel 21-48.
- Universal bracket for installation suitable for horizontal or vertical polarity mounting.
