

Blake 1-Way TV & Radio Launch Amplifier

BLATLA11 | Class 1 FM/DAB/UHF Terrestrial Launch Amplifier

Our triple-filtered multiband launch amplifier is compact and powerful, designed for distributing terrestrial television signals in residential and commercial applications such as homes, hotels, and student accommodations.

Technical specification

Number of Outputs	1
Width	53mm
Depth	220mm
Height	115mm
Weight	0.84kg

1	53MM	220MM	115MM
Number of Outputs	Width	Depth	Height

Key features

- Triple Filtering Technology: Reduces interference from 4G, 5G, and TETRA signals, ensuring exceptional signal quality.
- Low Noise: Offers a low noise figure of 2.5dB (typical) for clear signal reception.
- Energy Efficient: Only 4.5W, making it environmentally friendly and cost-effective for continuous operation.
- Linear Power Supply: Ensures a consistent and stable power output, reducing noise and enhancing overall performance.
- Test Point at -30dB: Making it easy to monitor signal levels and ensure optimal performance.
- Single Input (F-type): Supports FM/VHF/UHF signals. Recommended triplexer is the 4G, 5G filtered BLACOM31T (available separately).
- Variable Gain Control: Allows optimisation of signal strength for various cable lengths and signal weaknesses.
- Masthead Amplifier Power: Provides up to 100mA at 12V to power compatible masthead amplifiers like the BLAMHD11H.
